EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this Examiner's amendment was given in a telephone interview with Brian Hennasy on 7/10/2006.

The application has been amended as follows:

IN THE CLAIMS

Please replace claim 1 with the following:

1. A routing apparatus for obtaining routing data conforming to a destination address of a packet that arrives from a line, adding the routing data onto the packet, and switching the packet based upon the routing data to send the packet to a prescribed line, comprising:

a main controller having a routing data generator for generating routing data conforming to a requested destination address and sending the routing data to a requesting source;

a line interface for extracting a destination address from a packet that arrives from a line, generating routing-data request for requesting said main controller to be notified of routing data conforming to this destination address, adding the routing data of

Application/Control Number: 09/767,302

Art Unit: 2143

which notification has been given by said main controller onto the packet and then outputting the packet;

a switch for sending the routing data request, which enters from a prescribed line interface, to the main controller, sending the routing data from said main controller to a line interface of the requesting source, and switching a packet with attached routing data based upon the routing data to thereby send the packet to another line interface.

wherein said main controller has routing data generators, each associated with a line speed;

said line interface adds a line identifier onto a destination address of a packet that arrives from a line so that the routing data request is created and requests said main controller to be notified of routing data line, creating the routing-data request and notifying said main controller of routing data;

said main controller responds to the request by generating routing data from whichever routing data generator corresponds to a line speed indicated by the line identifier and sending this routing data to the line interface that is the requesting source.

Reasons for Allowance

Claims 1-3 and 5-9 are allowed in view of the Applicant's arguments (Response filed 5/19/2006, pages 7-8) and the cited prior art of record. The independent claims recite a routing apparatus for obtaining routing data conforming to a destination address of a packet which arrives on a line, adding routing data to the packet and switching the packet based upon the routing data to send the packet to a prescribed line, in which a

Application/Control Number: 09/767,302

Art Unit: 2143

line interface extracts a destination address from the packet, generates a routing data request to request a main controller to be notified of routing data conforming to the destination address, adds the routing data of which notification has been given from the main controller and outputting the packet from the line interface to a switch which sends the packet to a line interface, wherein the main controller has routing data generators, which are content addressable memories, each associated with a line speed, wherein the routing data generator is picked from a line identifier, added by the line interface, the line identifier corresponding to a line speed, which, in addition to the rest of the claim limitations, are distinguished from the prior art. For support, see Instant Specification (page 1, lines 5-15, page 10, lines 19-30, pages 11-12, 19-22).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to J. Bret Dennison whose telephone number is 571-272-3910. The examiner can normally be reached on Monday-Thursday 9am-5:30pm Eastern.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wiley can be reached on 571-272-3923. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
